County Employment and Wages in Puerto Rico — Third Quarter 2018

Employment in Puerto Rico's only large county, the municipio of San Juan, increased 1.3 percent from September 2017 to September 2018, the U.S. Bureau of Labor Statistics reported today. (Large counties are defined as those with 2017 annual average employment of 75,000 or more.) Chief Regional Economist Martin Kohli noted that in September 2018, San Juan's employment level of 242,000 accounted for 28.1 percent of total employment in the commonwealth.

In the United States, employment grew 1.6 percent over the year, as 295 of the 349 largest U.S. counties gained jobs. (See [table 1](#) and [chart 1](#).) The 349 largest counties made up 73.0 percent of total U.S. employment.

The average weekly wage in San Juan was \$649 in the third quarter of 2018, a 6.0-percent increase from one year prior. In the United States, the average weekly wage increased 3.3 percent to \$1,055. (See [table 1](#) and [chart 2](#).) Among the 349 largest U.S. counties, 336 had over-the-year increases in average weekly wages.

Chart 1. Percent change in employment, United States, Puerto Rico, and San Juan, September 2017-18

Source: U.S. Bureau of Labor Statistics.

Chart 2. Percent change in average weekly wages, United States, Puerto Rico, and San Juan, third quarter, 2017-18

Source: U.S. Bureau of Labor Statistics.

Employment and wage levels (but not over-the-year changes) are also available for the 77 municipios in Puerto Rico with employment below 75,000. All 77 municipios had wages below the U.S. average of \$1,055. (See [table 2](#).) Juncos, located on the eastern part of the island, had the highest average weekly wage, \$838. Two small municipios located on the northern part of the island, had average weekly wages above \$600—

Guaynabo (\$661) and Cataño (\$601). Thirty municipios had average weekly wages below \$400, with about half of these municipios located in the western part of the island, including Cabo Rojo (\$324) and Las Marías (\$322). (See [chart 3](#).)

In the neighboring Virgin Islands, average weekly wages were also below the U.S. average. The highest average weekly wage among the three Virgin Island counties was \$908 in St. Thomas. Average weekly wages on St. Croix and St. John were \$881 and \$685, respectively.

Of the 33,400 jobs in the U.S. Virgin Islands in September 2018, 17,700 were on St. Thomas, and 14,500 were on St. Croix.

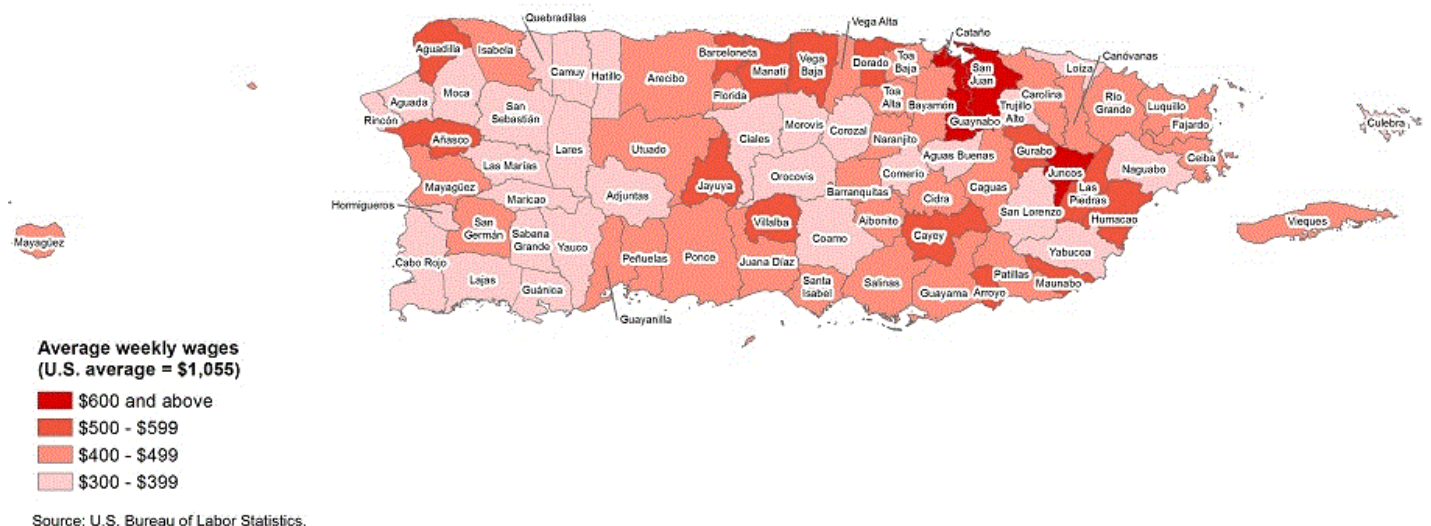

Additional statistics and other information

QCEW data for states have been included in this release in [table 3](#). For additional information about quarterly employment and wages data, please read the [Technical Note](#) or visit www.bls.gov/cew.

Employment and Wages Annual Averages Online features comprehensive information by detailed industry on establishments, employment, and wages for the nation and all states. The 2017 edition of this publication contains selected data produced by Business Employment Dynamics (BED) on job gains and losses, as well as selected data from the first quarter 2018 version of the national news release. Tables and additional content from *Employment and Wages Annual Averages 2017* are now available online at www.bls.gov/cew/cewbultn17.htm. The 2018 edition of *Employment and Wages Annual Averages Online* will be available in September 2019.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Chart 3. Average weekly wages by county in Puerto Rico, third quarter 2018

The County Employment and Wages news release for fourth quarter 2018 is scheduled to be released on Wednesday, May 22, 2019.

Technical Note

Average weekly wage data by county are compiled under the Quarterly Census of Employment and Wages (QCEW) program, also known as the ES-202 program. The data are derived from summaries of employment and total pay of workers covered by state and federal unemployment insurance (UI) legislation and provided by State Workforce Agencies (SWAs). The average weekly wage values are calculated by dividing quarterly total wages by the average of the three monthly employment levels of those covered by UI programs. The result is then divided by 13, the number of weeks in a quarter. It is to be noted, therefore, that over-the-year wage changes for geographic areas may reflect shifts in the composition of employment by industry, occupation, and such other factors as hours of work. Thus, wages may vary among counties, metropolitan areas, or states for reasons other than changes in the average wage level. Data for all states, Metropolitan Statistical Areas (MSAs), counties, and the nation are available on the BLS Web site at www.bls.gov/cew/; however, data in QCEW press releases have been revised and may not match the data contained on the Bureau's Web site.

QCEW data are not designed as a time series. QCEW data are simply the sums of individual establishment records reflecting the number of establishments that exist in a county or industry at a point in time. Establishments can move in or out of a county or industry for a number of reasons—some reflecting economic events, others reflecting administrative changes.

The preliminary QCEW data presented in this release may differ from data released by the individual states as well as from the data presented on the BLS Web site. These potential differences result from the states' continuing receipt, review and editing of UI data over time. On the other hand, differences between data in this release and the data found on the BLS Web site are the result of adjustments made to improve over-the-year comparisons. Specifically, these adjustments account for administrative (noneconomic) changes such as a correction to a previously reported location or industry classification. Adjusting for these administrative changes allows users to more accurately assess changes of an economic nature (such as a firm moving from one county to another or changing its primary economic activity) over a 12-month period. Currently, adjusted data are available only from BLS press releases.

Table 1. Covered employment and wages in the United States, Puerto Rico, and San Juan, third quarter 2018

Area	Employment		Average weekly wage ⁽¹⁾	
	September 2018 (thousands)	Percent change, September 2017-18 ⁽²⁾	Third quarter 2018	Percent change, third quarter 2017-18 ⁽²⁾
United States ⁽³⁾	146,824.1	1.6	\$1,055	3.3
Puerto Rico	862.5	0.2	534	5.3
San Juan	242.0	1.3	649	6.0

Footnotes:

(1) Average weekly wages were calculated using unrounded data.

(2) Percent changes were computed from quarterly employment and pay data adjusted for noneconomic county reclassifications.

(3) Totals for the United States do not include data for Puerto Rico or the Virgin Islands.
